“DOC” DOCUMENT INLAY

The Alien Technology® ALN-9741 “Doc” RFID inlay is designed for use on paper products such as documents and file folders where tags may be used in close proximity to each other.

Applications

- Paper/cardboard tagging
- Documents
- File folders
- Envelopes
- Booklets

FEATURE	DESCRIPTION	BENEFIT
Dielectrically matched to papers, cardboards and similar printed stock.	Allows tagging of documents, files, booklets and paper products.	Allows tags to be placed on documents or files where these documents will be tightly packed together with many tags in close proximity to each other. These tags have minimal chance of shadowing (hiding each other) from the reader.
Extremely tolerant to close placement of multiple tags.	Specifically designed to reduce shadowing of one tag over another.	
Next generation Higgs™ 4 features and performance	A mass-market optimized tag with class leading read and write performance. Supports Aliens <i>QuickWrite™</i> and <i>BlastWrite™</i>	Rapid programming of serialized tags and excellent read/write performance
