To whom it may concern:

The product Alien Technology supplies to you is considered to be an “article” under the Occupational Safety and Health Standards (OSHA), Title 29, Code of Federal Regulations, Part 1910.1200 (Hazard Communication). An article is defined in section c of the referenced standard as “a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

It should be noted that under normal conditions a material that is considered chemically inert might not exhibit these same characteristics under fire conditions. Combustion by products such as carbon dioxide, carbon monoxide and other hazardous materials may evolve as the product of combustion if a fire occurs. It is recommended that self-contained breathing apparatus and full protective clothing is worn by firefighting personnel. Firefighting procedures should include the use of dry chemical, carbon dioxide, water, foam and or fog extinguishing agents.

Sincerely

Alien Quality Control
